A full depth central eurogroove helps to make windows and doors more secure

”

“

PERFORMANCE

Recycled Thermal Reinforcement (RTR Bar) for increased thermal performance or steel reinforcement for added structural strength

”

“

THERMALLY EFFICIENT

Five chambered system for greater thermal efficiency

”

ADVANCE **70**

A PAS 24, SECURED BY DESIGN AND DOCUMENT Q COMPLIANT PVCu WINDOW AND DOOR SYSTEM

The Advance 70 chamfered and sculptured profile systems offer a 70mm frame depth and are extruded in the UK by Selecta Systems using lead-free PVCu material.

The chamfered 1700 system gives a modern look where-as the curved frame and sash on the 1800 sculptured system provide a softer appearance.

The Advance 70 chamfered and sculptured systems benefit from high security multi-point locking systems and internal beading for security. PAS 24, Secured by Design and Document Q options are also available for new build and commercial projects.

Fabrication and fitter friendly, the Advance 70 Window and Door System provides great versatility for fabricators, installers, homeowners and specifiers.

...another reason to #bepartof**thefamily**
